PROFILE

I'm a web developer who loves turning ideas into interactive and scalable web experiences. With 2+ years of experience, I enjoy building real-time, dynamic applications that blend creativity with logic, whether it's an AI-powered trading dashboard, a cloud-based music player, or automation tools that make life easier.

SKILLS

MERN Stack

Basic Java

Basic Python

Nest.js

Next.js

PostgreSQL

EXPERIENCE

Team Lead - WB Factories Website Redesign

2025 - PRESENT

Leading a cross-functional team to redesign the WB Factories government portal using React, NestJS, and PostgreSQL, delivering a scalable, secure, and user-friendly system aligned with government standards.

PROJECTS

Feedsense AI

2024 - PRESENT

A real-time trading dashboard that displays live market trades executed by an AI model. The system updates trades instantly as they open or close, and notifies users in real time using toast notifications. Built with a focus on speed, accuracy, and seamless user experience.

Droplet

2025 - PRESENT

A cloud-based music player that allows users to upload, store, and stream favorite songs from anywhere, or browse songs from the internet. It offers fast, reliable

playback and an elegant, modern interface.
